## Paperless processes are good for business.

A recent report from Forrester — *The Total Economic Impact™ of Adobe Acrobat Sign, January 2022*, shows that businesses are reaping significant benefits by switching to digital document workflows using Adobe Acrobat Sign. Sending and signing documents in minutes, from anywhere, on any device leads to increased return on investment (ROI). The ROI from using Acrobat Sign is now at 519%, up from 420% two years ago.

## Process faster transactions.

Organisations implementing Acrobat Sign have recognised a 30% improvement in transaction speed and a 50% acceleration in digital enrolments.

The benefits of using Adobe Acrobat Sign add up

A 519% ROI, up from 420% just two years ago. And it keeps getting better.

Organizations report huge value from Acrobat Sign.

## Realise better digital maturity.

The report reveals how Acrobat Sign enables businesses to better realise digital maturity in signature collection. Decision makers selecting their next digital solution wanted to use e-signatures across the whole organisation, within the apps where work was happening, with improved management and compliance. Acrobat Sign ticks all these boxes, thanks to cost-effective licencing, support for deep integration with business apps and its centralised administration console.

## Drive better business value.

The Forrester TEI report also outlines how Acrobat Sign drives better value within the business of organisations that have used it to implement e-signature workflows. Factors that led decision-makers to choose Acrobat Sign include creating seamless digital experiences for customers and improving the employee experience and productivity through streamlined workloads.
