# Cisco Secure

Enhancing Partner Profitability.
Empowering Customer Security.

## You're working to build the future, and it's a battle to keep it secure.

Your customers are constantly battling unrelenting demands to keep their organizations secure. They need to protect a workforce that needs to access applications and data on any device, anywhere, at any time. The need to fortify an increasingly digitized business to ensure every part of the ecosystem, from network to cloud, is safe. They need to ensure that workloads are secured wherever they're running, 24/7. You want your customers to make headlines for the right reasons, not the wrong ones.

### Why Cisco SecureX for your customers?

Connect Cisco's integrated security portfolio to existing infrastructure for a consistent experience that unifies visibility, enables automation, and strengthens security across the network, endpoints, cloud, and applications.

### Why Cisco Secure Remote Worker?

- Employees securely work from anywhere on any device
- Verify user identities and establish device trust
- Users access corporate resources from remote locations
- Defend users and devices from threats while on or off the network

## Cisco SecureX

Capitalize on Cisco's competitive differentiation in Security by providing customers with a comprehensive user experience across the breadth of Cisco's integrated security portfolio and customers' existing security infrastructure.

Cisco SecureX can help you open new opportunities to engage with your customers, build additional recurring revenue streams, and deliver value-added services.

### With Cisco SecureX you can help your customers...

#### Unify visibility across their entire security infrastructure

**BEFORE** SecureX
Teams regularly switch between consoles resulting in limited understanding and delays.

**AFTER** SecureX
Accelerate threat response with actionable insights.

#### Automate critical security workflows

**BEFORE** SecureX
Workflows are manual and convoluted, further slowing you down and causing human error.

**AFTER** SecureX
Increase the efficiency and precision of existing resources via automation to advance security maturity.

#### Collaborate better than ever

**BEFORE** SecureX
Teams currently operate within siloed views increasing their exposure.

**AFTER** SecureX
Share context between teams to streamline workflows.

#### Reduce complexity and maximize portfolio benefits

**BEFORE** SecureX
A lack of integration exists between tools, limiting their value.

**AFTER** SecureX
Multiply your capabilities by connecting your security infrastructure.

## Cisco Secure Secure Remote Worker

As the number of remote workers rise, empowering employees with secure remote working options helps protect their future and accelerate success.

Cisco Secure Remote Worker is a simple, scalable, integrated security solution that delivers the strength and breadth of Cisco platform approach to protect workforces everywhere.
